Decursus Media Releases Antherius Debut Album “2006-01”

Houston, Texas, USA – February 28, 2006

Antherius is a composer, engineer, and multi-instrumentalist – and is a brand new artist to the music industry. In his words, “2006-01 is my progress report,” speaking of his goal to provide original works by personally executing *all* of the necessary steps to completion – from the scoring of the music itself, through the performance of each instrument, to the engineering, arranging, studio mixdowns, and even the final mastering.

Antherius’ musical compositions are predominately mainstream in structure, and his arrangements blend rock/pop beats with symphonic and ambient textures into a sound that is uniquely his own. In genre-speak, 2006-01 has elements of *Progressive Newage, Progressive Rock, Ambient, House, and Electronica*. The album’s selections fit well with casual listening, entertaining, and a few for simply driving down the highway.

2006-01 can be reviewed/auditioned at antherius’ official website (www.antherius.com) and the CD is available for purchase at CD Baby, Tower Records, Amazon.com, and various digital distribution partners.
