Decursus Media Releases Antherius' Second Album '2008-03'

Houston, Texas, USA – March 25, 2008

Antherius is a multi-instrumentalist who singularly composes, performs, arranges, and engineers all aspects of the musical product. This second release is comprised entirely of his original works.

Antherius' musical compositions are mainstream in structure with arrangements that blend rock/pop beats with symphonic and ambient textures into a sound that is uniquely his own. His prior release '2006-01' fared very well for an initial work with several tracks spinning up into the National Radio (NAR & FMQB) charts that year.

2008-03 has elements of *Progressive New Age*, *Pop*, *Rock*, *Ambient*, and *Electronica*. The album's selections fit well with casual listening, entertaining, and a couple for cruising the boulevards.

All tracks from 2008-03 can be auditioned at www.antherius.com (official website). The CD is available for electronic purchase at iTunes, DigStation, Rhapsody, Napster, and many others. The physical CD will be initially available at CD Baby, Amazon.com, and Ebay.
